The Eastern Chure Terai Complex has three important ecological regions—mountains, hills, and plains. It contains the 175-square-kilometre Koshi Tappu Wildlife Reserve. And it is home to more than 1,000,000 hectares of forest.

The land and its people

Established partnerships with 11 local organizations
Brought benefits to about 10,000 people

The landscape and its people

Since 2002, we have supported local communities in Nepal to foster collaboration for forest management. We have worked with people and forest managers to improve their livelihoods and manage forests. We have supported the development of leadership skills and helped to strengthen partnerships among stakeholders.

Our experience in Nepal and the Eastern Chure
