Established partnerships with 11 local authorities and civil society. We have:

- Developed and scaled up a community-led model for adapting to climate change in Nepal, and
- Built the capacity of 710 people to manage natural resources and improve their livelihoods and manage forests. Through our work with people and forests, and have built trusting relationships at all levels of government, government agencies and local communities.

Since 2002, we have supported communities in Nepal to foster healthy, productive and prosperous landscapes. Our approach to supporting local communities to secure their land and resource rights, stop deforestation and degraded ecosystems already affected by climate change.

- To ensure the transition to a sustainable landscape in Nepal, we believe in a future where people live equitably and sustainably in and benefit from the landscape.
- We are the only non-profit organization of our kind in Asia and the Pacific. We have more than 30 years of experience working with people and forests, and have built trusting relationships at all levels of government, government agencies and local communities.

Our experience in Nepal and the Sacred Himalayan landscape

Since 2002, we have supported communities in Nepal to foster healthy, productive and prosperous landscapes. Our approach to supporting local communities to secure their land and resource rights, stop deforestation and degraded ecosystems already affected by climate change.
